

SolidWorks Student Edition Software

Joshua

[Sign out](#)

Joshua Spiesman, we currently have licenses available for the SolidWorks Student Standard Edition software.

Read the instructions below for installation and licensing.

1. Go to <https://www.solidworks.com/support/community-download> and start filling out the form. See form example below.
2. Be sure to select the 2025 edition.
3. It will ask if you have a serial number already, click yes. The serial number is:

9020 0084 7259 2943 HT73 H45F

(You will use the above serial number later during the install process)

4. Agree to the terms, then you will be allowed to download the SolidWorksSetup program.
5. Once downloaded, run the program to install SolidWorks. During the install the setup program will be downloading a large amount of data to your computer, so I would suggest that you do the install when you have a fast internet connection. Also, SolidWorks has many components that can be installed. We would recommend that you only install the components you need, i.e. do not install the electrical component if you are not working with electrical design.

For more information on installing SolidWorks click on the installation help button below.

For more information on free SolidWorks certification exams, click on the Free Certification Exams button below.

For additional free training resources, you can use the serial number provided above to sign up for MySolidWorks. (<https://my.solidworks.com/account/student-access>)

Again, please note this is an educational license. As such there are non-allowed uses which include but not limited to commercial projects and research projects. Please read the license agreement.
